ROLAND INTRODUCES PM-100 AND PM-200 PERSONAL MONITORS

Powerful New Amplification Systems for Roland's V-Drums

The NAMM Show, Anaheim, CA, January 11, 2018 — Roland (ACC North, Level 2, Exhibit 17420) introduces the PM-100 and PM-200 Personal Monitors, two new amplification systems designed for use with V-Drums electronic percussion products. These compact all-in-one monitors are specially optimized for the famously expressive sound and response of Roland's V-Drums, providing the ultimate full-range monitoring experience for playing and practicing at home with any V-Drums set.

The [PM-100](#) features 80 watts of power, a custom 10-inch speaker, and a tweeter, while the [PM-200](#) features 180 watts of power, a custom 12-inch speaker, and a horn tweeter. Each monitor is designed to be placed on the floor, and the front face is angled to provide ideal sound coverage for a seated player. A full-width bar handle on top offers a convenient way to carry the monitor and adjust its floor position.

Each monitor includes an integrated mixer with a dedicated V-Drums input, plus 1/4-inch and 1/8-inch line inputs for connecting additional devices like electronic percussion pads, smartphones, and music players. Independent volume controls are provided for the V-Drums and line input sections, and there's a two-band equalizer for shaping the overall sound.

The PM-200 is also equipped with two XLR direct outputs that allow the user to pass sounds to a mixer or recording device, providing additional flexibility for using the monitor in stage, rehearsal, and studio applications. Via a panel switch, the outputs can be configured for either dual mono or stereo operation.

To learn more about the PM-100 and PM-200 Personal Monitors, visit Roland.com.

About Roland Corporation

Roland Corporation is a leading manufacturer and distributor of electronic musical instruments, including keyboards and synthesizers, guitar products, electronic percussion, digital recording equipment, amplifiers, audio processors, and multimedia products. With more than 40 years of musical instrument development, Roland sets the standard in music technology for the world to follow.
