ROLAND NOISE EATER DRUM HARDWARE NOW AVAILABLE

An Expansion of the V-Drums Line, the Innovative New Noise Eater Drum Hardware Solves Noise Problems for Electronic Drums

Los Angeles, CA, May 8, 2018 — Roland announces the availability of its premium Noise Eater drum hardware, an innovative new line of accessories for electronic drums that applies Roland technology to solve the age-old noise and vibration problem faced by electronic drummers. Designed specifically for electronic drums, the professional-level construction offers an advanced built-in noise and vibration reduction system like no other piece of drum hardware available, and offers a perfect hardware match for Roland's industry-leading V-Drums lineup. Roland's Noise Eater technology is offered in an assortment of drum pedals and stands including the [RDH-100 Noise Eater Single Kick Pedals](#), the [RDH-102 Noise Eater Double Kick Pedals](#), and the [RDH-120 Noise Eater Hi-Hat Stands](#).

The Noise Eater hardware's pioneering built-in anti-vibration system helps reduce unwanted noise and vibration sounds from electronic drums by up to 50 percent and works by using an air channel and rubber system to suspend the hardware off the ground. Built to the same standards of quality and durability that Roland instruments are famous for, the new Noise Eater drum hardware delivers top-level performance in studios, apartments, condos or flats and for practicing drummers of all levels.

Roland's new Noise Eater drum hardware will be available through authorized Roland V-Drums dealers. To learn more, visit Roland.com.
