FOR IMMEDIATE RELEASE

Roland Announces RD-88 Stage Piano

Streamlined and Affordable Digital Performance Piano with Premium Roland Sound and Features

Anaheim, CA, January 15, 2020 — Roland (NAMM Hall A, Booth #10702), announces the [RD-88 Stage Piano](#), the latest model in the company's long-running RD series. For over 30 years, Roland RD pianos have been the top choice of professional keyboardists, appearing regularly on stages all over the world. Offering premium features in a light, streamlined design, the RD-88 delivers renowned RD sound and playability in an affordable instrument that's simple to use and easy to carry.

Equipped with the 88-note PHA-4 keyboard, the RD-88 provides exceptional feel and response with Roland's award-winning hammer action and Ivory Feel keys. Every musical nuance is perfectly translated, giving serious players the inspiring touch they need for authentic performances. A high-quality speaker system is also integrated into the instrument's design, offering convenient self-contained amplification for home practice and convenient monitoring.

Drawing on Roland's rich sound heritage, the RD-88 includes a wide selection of instruments including stunning, newly developed SuperNATURAL pianos and electric pianos. For added versatility, a curated collection of acoustic and electronic sounds are also on board, including modern synth sounds powered by the latest Roland sound engine.

The RD-88 is refreshingly intuitive to use while performing, with fast-access controls for selecting sound categories, creating layers and splits, and more. It's easy to shape the tone color via grab-and-go knobs and enhance sounds with compressor, chorus/delay, reverb, and other effects. Favorite setups can be stored for quick recall, and a One-Touch Piano button allows the player to quickly return to their core piano sound any time they like.

Advanced users will love the RD-88's zone features and easy computer integration. Software-based sounds can be played through the RD-88 via USB, and three zones can be configured with internal sounds or set up to control virtual instruments from Apple MainStage.

The RD-88 features a clean and compact design that fits neatly into any musical situation. Weighing just 13.5 kg/29 lb. 13 oz., it's easy to move and set up, even on small stages or in cramped rehearsal spaces.

For a hands-on demo of Roland products like the RD-88 Stage Piano, visit Hall A at The NAMM Show in Anaheim, California, at booth #10702 from January 16-19, 2020.

Availability & Pricing

The Roland [RD-88](#) Stage Piano will be available for \$1,199.99 in March 2020.
