ROLAND ANNOUNCES TD-1KPX V-DRUMS

Authentic Playability, Mesh-Head Pads, and Maximum Portability

Hamamatsu, Japan, September 10, 2016 — Roland has announced the TD-1KPX V-Drums, the latest addition to the portable V-Drums line. The TD-1KPX features great V-Drums sound, authentic playability with mesh-head V-Pads, and an innovative folding stand that allows users to transport and store the set without having to remove pads and cymbals. With its compact design, the TD-1KPX is perfect for enjoying drums in small living spaces. It's also a great fit for performing, rehearsals, and use in music education environments.

Durable and sturdy, the TD-1KPX's newly developed folding stand can be set up in seconds with a standard drum key. Simply unfold the stand, adjust the pad positions, attach an acoustic kick pedal (not supplied), and start drumming. Just as quickly, the stand folds down into a surprisingly condensed size for transport and stowing away at home in a corner, under a table, or in a closet.

The TD-1KPX comes with an 8-inch PDX-8 V-Pad for snare and three 6.5-inch PDX-6 V-Pads for toms. The pads are equipped with mesh heads for natural rebound, feel, and playability, and feature Roland's dual trigger technology for accurate and even sensing between the head and rim. CY-5 cymbal pads are included for cymbals and hi-hat, which provide 10-inch playing surfaces and natural swinging movement. The cymbals have separate bow and edge triggering, while the hi-hats offer smooth tonal transitions from open to closed.

Built into the TD-1KPX module is a wealth of enjoyable functions to encourage learning. Users can tighten their timing by playing along with the built-in metronome, and develop speed, stamina, and accuracy with numerous Coach functions. The module also includes many internal songs to jam with, plus a Mix In jack for connecting a smartphone or music player to drum along with favorite tunes. And with the convenient recording function, players can capture performances to get instant feedback on their progress.

With the TD-1KPX module's USB-MIDI interface, users can enjoy making music with a computer. Roland's free V-Drums Friend Jam applications include jam tracks, practice features, and the ability to interact with other V-Drums users around the world. USB-MIDI also allows the TD-1KPX to be used to record realistic MIDI drum tracks in music production software.

Roland also offers many optional accessories to enhance the drumming experience. For beginning players, the DAP-3X V-Drums Accessory Package provides everything needed to start playing the TD-1KPX, including drumsticks, an acoustic kick pedal, and a drum throne. The CB-TDP Carrying Case offers a convenient way to transport and protect the TD-1KPX. Other available accessories include quiet kick trigger pedals like the KT-10 and KD-9, the TDM-3 V-Drums Mat for floor protection, and the PM-03 Personal Drum Monitor for amplification.
