BOSS WAZA GUITAR SPEAKER NOW AVAILABLE SEPARATELY

Custom-Designed 100-Watt Speaker Delivers the Ultimate Rock Sound

Hamamatsu, Japan, July 11th, 2019 — BOSS announces that the Waza guitar speaker is now available separately in selected regions around the world. First developed for the flagship Waza Amp Head, the 12-inch Waza speaker captures the authentic tone of the legendary 25-watt British stack speaker from the 1960s, long considered the ultimate for rock guitar. Offering an impressive power capacity of 100 watts, the Waza speaker brings together classic sound and modern power handling in a new BOSS design.

The 25-watt British stack speaker is the touchstone rock guitar speaker, and its smooth voice and wide dynamic range are vital elements of the celebrated “brown sound” heard on countless classic recordings. Backed by BOSS’s meticulous design approach, the Waza speaker realizes the original’s full mojo while boosting the power capacity to meet the needs of today’s guitarists.

The Waza speaker is a drop-in replacement for nearly any standalone guitar cabinet or combo amplifier that supports standard 12-inch drivers. It was previously available in the Waza Amp Cabinet 212 and Katana-Artist amplifier, and is still included in those products.
