## **BOSS EXPANDS MIDI CABLE LINEUP WITH SPACE-SAVING SOLUTIONS**

*Low-Profile MIDI Cables Offer High-Quality Connectivity for BOSS Pedals  
Equipped with 3.5 mm TRS MIDI Jacks*

**BMIDI-1-35 and BCC-1-3535 (left to right)**

**Hamamatsu, Japan, September 16, 2021** — BOSS has added four TRS MIDI patch cables to the company's growing family of premium accessory products for musicians. These rugged and reliable cables provide high-quality MIDI connectivity for the expanding lineup of BOSS pedals with space-saving 3.5 mm TRS MIDI jacks.

The BOSS BCC-1-3535 (1 ft./30 cm length) and BCC-2-3535 (2 ft./60 cm length) MIDI cables allow users to interconnect BOSS pedals with TRS MIDI I/O, including the 200 series, GT-1000CORE, EV-1-WL, and others. The cables are equipped with right-angle 3.5 mm TRS connectors on both ends, with custom plug housings that feature slim profiles to maximize space in tight pedalboard setups.

The BOSS BMIDI-1-35 (1 ft./30 cm length) and BMIDI-2-35 (2 ft./60 cm length) MIDI cables feature 3.5 mm TRS and 5-pin DIN connectors. They enable communication between BOSS pedals with TRS MIDI I/O and devices equipped with traditional MIDI jacks, from pedals, loop switchers, and multi-effects units to keyboards and MIDI interfaces for computers. The cables offer efficient connectivity with a slim right-angle plug housing on the TRS side and three-way cable adjustment on the 5-pin DIN connector.

These new products expand the BOSS lineup of MIDI cable solutions, which also includes the BMIDI-PB series (5-pin MIDI cables with multi-directional connectors, available in three lengths) and the BMIDI-5-35 cable (3.5 mm right-angle TRS to 5-pin MIDI, 5 ft./1.5 m length).
