Roland Announces Graphics Presenter Integration with the Elgato Stream Deck Platform

Graphics Presenter Version 2.0 Adds Remote Control Support from Elgato's Popular Hardware Platform and Other Enhancements

Hamamatsu, Japan, November 11, 2025 — Roland Professional A/V announces the Version 2.0 release of Graphics Presenter, a powerful titler and motion graphics software solution for select Roland video products. This update introduces remote control support from Stream Deck, Elgato's popular hardware control platform for computers. It also includes workflow enhancements such as a remaining time counter and additional template content.

Available as a free download for Windows computers, Graphics Presenter allows users of compatible Roland switchers (V-160HD, V-80HD, V-8HD, VR-120HD, and VR-6HD) to easily create stunning titles and graphics, eliminating the need for expensive third-party graphic presentation solutions. Setup is quick and straightforward, requiring only a single HDMI connection to send fill and key signals from the computer to the switcher.

Graphics Presenter offers an intuitive workflow and a wide selection of ready-to-edit templates, including animated title text, sports scores, motion graphics, and more. The software includes over 180 templates, and additional content will periodically be provided as free downloads on Roland Cloud.

Graphics Presenter Version 2.0 supports control integration with the Elgato Stream Deck platform through a dedicated plug-in. Users can create custom buttons for quick hardware control of templates and many other software functions. The Graphics Presenter Stream Deck plug-in is available for free on Elgato Marketplace.

About Elgato

Elgato is a world-leading provider of audiovisual technology for content creators on all video-sharing platforms. Synonymous with quality and performance, Elgato products are either state-of-the-art inventions in their own right or reimagined technologies designed to revolutionize creative workflows. Software and firmware are frequently updated to keep producers at the cutting edge of their craft. And cross-compatibility delivers a seamless user experience that keeps evolving as the Elgato ecosystem grows. Elgato was founded in 1999. In 2018, Corsair Gaming, Inc. acquired the brand and its employees. Based in Germany and California, Elgato distributes products in over 75 countries around the world.

About Roland Professional A/V

Roland's professional A/V division, dedicated to providing solutions in support of video and audio professionals, demands excellence in both performance and functionality. Through the development and support of video and audio products, Roland Pro A/V endeavors to improve workflow and maximize creative possibilities in a variety of markets, including live event production, livestreaming, education, corporate meetings, worship, videography, and gaming.
