Roland Achieves “B” Score in the CDP Climate Change Assessment for Second Consecutive Year

Leading international environmental research organization evaluates Roland's environmental initiatives

Hamamatsu, Japan, February 3, 2026 — [Roland Corporation](https://www.roland.com/), a world-leader in music creation and musical and multimedia product manufacturing, announces that it has achieved a "B" score at the management level for the second consecutive year in the "CDP Climate Change Report 2025" published by [CDP](https://www.cdp.net/), an international non-profit organization that conducts environmental surveys and promotes information disclosure.

CDP evaluates and discloses the strategies and initiatives of companies and municipalities regarding issues such as "Climate Change," "Forests," and "Water Resources." It is widely recognized as the global standard for corporate environmental reporting. In 2025, over 22,100 companies worldwide disclosed environmental data through CDP.

Using an eight-tier rating system from "A" to "D-", CDP assesses the depth and the effectiveness of organizations climate action. Roland's "B" score, the third-highest management level, reflects the company's strong understanding climate-related risks and opportunities as well as its ongoing implementation of concrete, measurable actions to address them.

Roland has long contributed to society's sustainable development through its leadership in music and visual culture, empowering creativity and fostering positive social impact. Building on this foundation, Roland will continue to deepen its contributions through arts and culture while actively addressing pressing social challenges like climate change and human rights.

Through efforts like these, Roland remains committed to helping shape a more sustainable future where innovation, creativity, and environmental responsibility move forward together.
